**A review on the education program "International
Economics" (specialty 051 Economics)**

The education program "International Economics" aimed at theoretical and practical training of specialists in international economics. The relevancy of the education program is determined by increasing demands on the global market and strengthening requirements to international business communications skills. Such factors as an increasing role of international economic relations in social and economic country development, and complications of export and import activities have led to the development of this

program. The main goal of the program is that the students have learned theoretical knowledge and practical skills in export and import activities, international business communications, and the implementation of international projects. Graduates of the program will be prepared for career opportunities in global trade, international business relations, and the international enterprise sector.

Pagina 2 di 2

The education program is aimed at training of specialists, who possess knowledge of international trade, global leadership, international digital economy, innovations on the world market, export and import, international business administration, international production, and intercultural business communications. In our opinion, the implementation of the education program "International Economics" (second master level) is relevant and meets modern public demands.
